

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Recently retired, after spending many years working with his brother to assemble their crane company into an market leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

During their trip, John reacquainted himself with past business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast marketplace for a product that could quickly and securely elevate people in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John formed a joint venture with two friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they built and sold the first JLG aerial work platform. The company incorporates some of the basic design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into many different international markets and continues to develop contemporary machines to ensure that consumers are able to become safer and more well-organized within their workplace.
